

Thank you for purchasing this asset pack.

This package contains high-quality, game-ready 3D assets designed for use in Unity projects. All assets are optimized, properly scaled, and ready to drag and drop into your scene.

Package Contents

- FBX source files
- Materials
- Textures (PBR workflow)
- Ready-to-use Prefabs
- Demo Scene

Prefabs include properly assigned materials and colliders for immediate use.

Render Pipeline

This asset pack is created for Unity URP.

If you are using a different render pipeline, materials may require manual conversion.

Customization

You are free to:

- Modify materials
- Replace textures
- Adjust colliders
- Edit included FBX files
